

SAFE AND EFFICIENT SPRAYING TECHNIQUES

Utilising our fully computerised **5m folding covered booms**, we can provide the only completely drift free spraying environment and full coverage of the plant in sensitive areas. The spray units are fitted with Hardi spray equipment computers to calibrate the exact rate of chemical to the required area. The tractors that support the spray units are fitted with turf tyres for minimal impact.

We also offer **ATV bikes** complete with 100 litre spraying units and 3m booms and hand reels with shrouded nozzle as well as various **hand spraying applications** such as backpack sprayers complete with nozzle cones.

The **Weedbug** rope application - spinning disk system with 12 radial arms of wick attached to each of the three spinning disks and the Roundup reservoir.

Comprehensive spraying programmes can be developed to suit your needs. Detailed spray records are provided for each site serviced, along with appropriate Work Method Statements. All our operators hold Chemcert accreditation. The Green Horticultural Group fully complies with all OH&S and Environmental legislation.

The Green Horticultural Group is highly aware of the importance of working in favour of our environment and ensures that our skilled staff carry out all works in accordance with Chemsafe guidelines.
