To whom it may concern

The Sydney Olympic Park Athletic Centre provides training, competition and leisure facilities for elite athletes and the general community. This world- class facility includes a variety of playing surface arenas and the surrounding green areas of the Centre are unique due to the abundance of trees, scrubs and turf supported by a sophisticated irrigation system.

Green Horticultural Group (GHG) were recently successful in Tendering for the returfing of the Athletic Centre arenas. Tenders were received by a multitude of landscaping companies and GHG were deemed to offer the most competitive price and provided excellent remedies and a scope of works that were superior. The works were completed before the required time frame and although the scope of the works was altered several times, there was no financial variation.

GHG are an exceptionally strong and ethical horticultural company. GHG employ only the most qualified of horticulturalist, green keepers and landscape technicians. The service is overseen by a very professional and hands on motivated management team that ensures that all works are completed to a level higher than the client expected. Green Horticultural Group also provided assistance on a variety of landscaping and turf complexities at no cost to the Centre.

GHG has an extensive and comprehensive Environmental and OH&S procedures ensuring that the companies' strong work ethics are well supported by proper procedures and work practises.

GHG General Manager, Geoff Green's commitment and team leadership qualities have been instrumental in GHG receiving many commendations and positive feedback from the public. He enjoys the challenges of ensuring the staff under his delegation strive to ensure that the grass in the facilities are maintained to exceptional levels and that his staff are expertly trained and have exceptional customer service skills.

Personally, Geoff Green is a very likeable individual, has a warm and caring attitude to other staff, enjoys dealing with the public, performs more work than expected, was always on time and works many additional hours without any financial implications to the Centres.

I can be contacted on 0417 491 320 to clarify any of the above.

Yours faithfully,

Ian Kennedy
