

SPREADING PRODUCT ON YOUR SURFACES

Our unique specialised spreading vehicles can offer:

- ✓ **Balloon flotation tyres** with adjustable incabin tyre pressure
- ✓ **Low pressure impact** on areas to be spread
- ✓ **Fully computer controlled** with GPS capability for the most accurate, economical and efficient spreading of any type of product.
- ✓ **Unique dropper applicator** for powdered products (eg. Dolomite) for minimal dust emission for an environmentally friendly spread.
- ✓ **Professional and experienced operators** with appropriate licences and certification to operate the specialised machinery.
- ✓ **Rubbing in** topdressing can be undertaken with brooms, lawn leveller or chain mesh mat.
- ✓ **Tow behind spreaders** are available for softer profiles and smaller areas.

These 4WD vehicles are designed to handle most terrains and site conditions from horticultural, landscaping, turf, civil, agricultural and mine sites.
