

PROJECT PROFILE CAMPBELLTOWN STADIUM

Client: Campbelltown City Council

Maintained by GHG from 2001 to 2012, Campbelltown Stadium is the home of the Wests' Tigers RLC and the venue for a variety of first grade sporting codes.

GHG carried out a resurfacing programme to re-align levels and improve turf quality. The result, a first-class surface that meets the requirements of the numerous sporting codes vying to use the facility.

SCOPE OF WORKS:

- Irrigation heads were marked and removed
- Stripping of surface to a depth of 60mm using a Koro Topmaker
- Final trim of the surface
- Import and spread 60 tonnes of growing medium
- Laser leveling
- Irrigation points relocated, flushed and reinstalled
- Final hard trim using laser controlled equipment
- Application of soil amendments and fertilisers as indicated from soil analysis
- Turfing with Legends Turf grown on consignment specifically for this project
